

STUDY OF THE ACCUMULATION OF ZINC BY THE RAY GRASS PLANTED IN CONTAMINATED SOIL

Authors

NAWEL KHERBANI, NADIA ABDI, HAKIM LOUNICI

Publication date

2016/7/27

Journal

Journal of Global Ecology and Environment

Pages

11-17

Description

Most sites contaminated with heavy metals, the phytoextraction is based on the use of plants for the remediation of contaminated sites. This technique is not very aggressive to the environment and relatively inexpensive.
